St. Petersburg, FL -- Plasma-Therm LLC, a global supplier of plasma process equipment, is thrilled to announce the launch of its new Web site. Located at www.plasmatherm.com, the site acts as an informational tool that educates Web site visitors about etch and deposition technologies in addition to offering detailed information about Plasma-Therm products and service benefits.

The new high tech Web site is currently accessible in English and will soon be translated to other languages to better communicate with our global customer base. An up-to-date news feed, interactive sales and service contact map and current events calendar will make connecting with Web site visitors from around the world simple.

“Our Web site was designed to communicate with a variety of different audiences: from our current customers to the next generation of industry professionals,” stated Ed Ostan, EVP of sales and marketing at Plasma-Therm. “We are trying to build a tool that will benefit our industry and act as an easy-to-use, informative resource while promoting two-way communication.”

Plasma-Therm, founded in 1974, is a supplier of advanced plasma process equipment that caters to various specialty markets including photomask, solid state lighting, thin film head and compound semiconductor. Plasma-Therm offers both dry etch & PECVD technologies. To meet the diverse needs of our global customer base, Plasma-Therm has sales, service and spares locations throughout North America, Europe and Asia-Pacific.
